College of  
Teachers  
Thinking About  
Teaching?

# Thinking About Teaching?

Ontario students need great teachers, people who are patient, flexible, passionate about learning and motivated to help others achieve.

Think about a career in teaching, if you are:

**Curious**  
**Caring**  
**Outgoing**

**Organized**  
**Compassionate**  
**Self-disciplined**

**Flexible**  
**Dedicated**  
**Self-starting**

**Thoughtful**  
**Nurturing**  
**Team oriented**

Do you want ongoing opportunities for personal and professional learning? Teaching offers challenges and personal rewards that come from knowing you can help others to acquire the knowledge and skills they need to pursue their life goals.

Teachers communicate, counsel, model and manage, using a wide array of methods and resources to guide students. They use a mix of traditional and technological approaches to spur student achievement, tracking student progress and refining their practices as they go.

Teachers listen to and work with other teachers, parents, professionals and community partners to build an atmosphere of respect and collaboration necessary for academic achievement and character development.

Teachers open doors for everyone!

## What you need to become a teacher

To teach at the elementary and secondary level in Ontario, you will need to complete at least three years of full-time study at university or college leading to a postsecondary degree (a BSc, for example). Currently, you will need at least one year of full-time, postsecondary study leading to a Bachelor of Education degree (or equivalent). **Starting September 2015, you will require two years of full-time, postsecondary study leading to a Bachelor of Education degree (or equivalent).**

Technological education teachers don't require a postsecondary degree, but must have five years of work experience in the teacher's field of technological education (not as a teacher) or a combination of work and postsecondary studies.

Teachers of aboriginal ancestry don't necessarily require a postsecondary degree.

Some universities offer part-time programs to enable people who are going into teaching as a second career to acquire their qualifications while continuing to work.

## Entry to faculties

Good marks alone won't necessarily guarantee you entry to a faculty of education. Some faculties rely solely on marks. Some require applicants to sit for an interview. Some have a points system that weights marks and volunteer experience. Aboriginal education or technological education programs may have different requirements to apply.

## Draw on your experience

Volunteering with school, community, recreation or religious programs will show your interest for teaching. Many education faculties ask applicants to complete a profile that details their experience working with students. Check the faculty websites for details.

## Join the College

You must become a member of the Ontario College of Teachers to qualify to teach in Ontario's publicly funded elementary and secondary schools.

The College licenses, governs and regulates Ontario's teaching profession in the public interest. It sets ethical and practice standards for educators, accredits teacher education programs and conducts disciplinary hearings.

Visit [www.oct.ca](http://www.oct.ca), call Client Services at 416-961-8800 or toll-free in Ontario at 1-888-534-2222, or email us at [info@oct.ca](mailto:info@oct.ca) to learn more about the College.

## Prepare to compete

The interest in teaching as a career remains high. However, the demand for English-language elementary and secondary teachers is in decline. Some specialty areas such as French as a Second Language and technological education offer greater prospects for regular, full-time work. However, be prepared to start your career in occasional (supply) roles. School systems across Canada and around the world also hire certified Ontario teachers. See our Transition to Teaching reports at [www.oct.ca](http://www.oct.ca).

## If you learned to teach outside Ontario...

Out of province and internationally educated teachers must still become certified by the Ontario College of Teachers to teach in Ontario's public schools. See our registration guides at [www.oct.ca](http://www.oct.ca).

## 5 Steps to Becoming a Teacher

### Step 1

Get a well-rounded high school education, including good marks in mathematics, science and the liberal arts.

### Step 2

Gather experience working with children.

### Step 3

Decide what level and subject you'd like to teach. Explore the university and faculty programs to see which ones suit you.

Teachers in Ontario must earn basic qualifications in two consecutive divisions in their teacher education program.

Primary (Kindergarten to Grade 3)  
Junior (Grades 4-6)  
Intermediate (Grades 7-10)  
Senior (Grades 11-12)

### Step 4

Earn a postsecondary degree and a Bachelor of Education degree or equivalent. To teach Grades 7 to 10, you need to qualify as an expert in one subject. To teach Grades 11 and 12, you must be qualified to teach two subjects.

### Step 5

Apply to become a member of the Ontario College of Teachers. Once the College certifies you, you can seek employment in Ontario's schools.

## To Teach in Elementary School:

Elementary school teachers teach most subjects to their students. A well-rounded high school education, including a strong grounding in the liberal arts, mathematics and science will provide a strong foundation and prepare you for university.

In university you can specialize in one or two subjects from the elementary curriculum such as English, history, science or math. A course in psychology, child development or sociology of the family can also help prepare you for the classroom.

## To Teach Secondary School:

Secondary school teachers require academic credentials in at least two subjects. (See Schedule A on page 3.) At university, you may wish to take English and history, or music and mathematics, or math and science. Take an honours degree if you think you might like to become a subject specialist.

## Become a high school technological studies teacher

You might already have the foundation for a secondary school teaching position in technological education if you have on-the-job experience in the following fields or sectors:

- Construction
- Communications
- Manufacturing
- Hospitality and tourism
- Hairstyling and aesthetics
- Health care
- Computer technology
- Design
- Transportation
- Green industries.

You don't need a postsecondary degree to teach technological subjects, but proven experience and competence are essential.

You will need a high school diploma or equivalent, five years of paid work experience in the technological education subject area and an acceptable teacher education program.

You can also enter the teacher education program with a combination of work experience and related postsecondary education from a university or a college of applied arts and technology.

### Teacher Education at Ontario's Faculties of Education

Ontario's faculties of education offer a variety of programs in a variety of ways. If you are interested in studying to become a teacher, you should research several of these programs to find the best one for you. For information about programs and admission requirements, please contact the individual faculty.

A **concurrent** program of professional education is undertaken at the same time as a program leading to a postsecondary degree in a discipline other than education.

A **consecutive** program of professional education is undertaken after you have completed your postsecondary degree. However, a postsecondary degree is not necessarily required for entry into technological education and Aboriginal teacher education programs. Contact the faculties for more information.

All pre-service teacher education programs offered by Ontario's faculties of education are accredited by the Ontario College of Teachers.

For more information about the College, please visit our website at [www.oct.ca](http://www.oct.ca) or call Client Services at 416-961-8800 or toll-free in Ontario at 1-888-534-2222.

You must apply online to publicly funded consecutive programs of teacher education via the Ontario Universities' Application Centre (OUAC) website at [www.ouac.on.ca](http://www.ouac.on.ca). Applications are available annually in mid-September and must be submitted to OUAC by the deadline, usually in early December. You have to apply directly to universities that are not publicly funded. The faculty to which you have applied may ask you to provide additional information directly. Check their websites for further details about any additional requirements.

## Schedule A - Intermediate and Senior Divisions

- Anglais
- Business Studies - Accounting
- Business Studies - Entrepreneurship
- Business Studies - General
- Business Studies - Information and Communication Technology
- Classical Studies - Greek
- Classical Studies - Latin
- Computer Studies
- Dance
- Dramatic Arts
