Additional Qualification Course Guideline Integration of Information and Computer Technology in Instruction, Part II

(Previous Name: Computers in the Classroom)

Schedule D Teachers' Qualifications Regulation

July 2013

Ce document est disponible en français sous le titre *Ligne directrice du cours menant à la qualification additionnelle, Intégration de la technologie de l'information et communication dans l'enseignement, deuxième partie, juillet 2013.*

Additional Qualification Course Guideline Integration of Information and Computer Technology in Instruction, PART II

1. Introduction

Three-session specialist Additional Qualification courses identified in Schedule D (Teachers' Qualifications Regulation) are intended to:

- enhance professional practice, and extend knowledge and skills in the Integration of Information and Computer Technology in Instruction (Part I)
- enhance professional practice, and extend and apply knowledge and skills in the design and Integration of Information and Computer Technology in Instruction (Part II)
- enhance professional practice, and extend and apply knowledge and skills in the curriculum leadership of integration of Information and Computer Technology in Instruction (Specialist).

The Additional Qualification Course: Integration of Information and Computer Technology in Instruction, Part II employs a critical lens to explore in a holistic and integrated manner theoretical foundations, the development of learners, program planning and implementation, assessment, the learning environment and ethical considerations related to teaching and learning across the divisions.

Critical to the implementation of this course is the modeling of a positive learning environment that reflects care, diversity and equity. This course supports the enhancement of professional knowledge, ethical practice, leadership and ongoing learning.

The Ontario College of Teachers recognizes that candidates working in the publicly funded school system, independent/private institutions or First Nations schools will have a need to explore in an integrated delivery model, topics and issues of particular relevance to the context in which they work or may work.

The French language and the English language communities will also need to implement these guidelines to reflect the unique contextual dimensions and needs of each community. Each of these language communities will explore the guideline content from distinct perspectives and emphasis. This flexibility will enable both language communities to implement Integration of Information and

Communication Technology in Instruction as understood from a variety of contexts.

The Integration of Information and Communication Technology in Instruction Part II additional qualification course guideline provides a conceptual framework for the course. Course providers and instructors use the guideline to develop and facilitate the Integration of Information and Communication Technology in Instruction Part II course. The guideline framework is intended to be a fluid representation of key concepts and direction associated with Integration of Information and Communication Technology in Instruction.

2. Regulatory Context

The College is the self-regulating body for the teaching profession in Ontario. The College's responsibility related to courses leading to Additional Qualification includes the following:

- To establish and enforce professional standards and ethical standards applicable to members of the College.
- To provide for the ongoing education of members of the College.
- To accredit Additional Qualification courses and more specifically,

The program content and expected achievement of persons enrolled in the program match the skills and knowledge reflected in the College's Standards of Practice for the Teaching Profession and the Ethical Standards for the Teaching Profession and in the program guidelines issued by the College. (Reg. 347/02, Accreditation of Teacher Education Programs, Part IV Subsection 24).

Additional qualifications for teachers are identified in the *Teachers' Qualifications Regulation*. This regulation includes courses that lead to Additional Qualifications, the Principal's Qualifications and the Supervisory Officer's Qualifications. A session of a course leading to an Additional Qualification shall consist of a minimum of 125 hours of work that is approved by the Registrar. Accredited Additional Qualification courses reflect the *Ethical Standards for the Teaching Profession*, the *Standards of Practice for the Teaching Profession* and the *Professional Learning Framework for the Teaching Profession*.

The course developed from this guideline is open to candidates who meet the entry requirements identified in the *Teachers' Qualifications Regulation*.

Successful completion of the course leading to the Additional Qualification: Integration of Information and Computer Technology in Instruction Part II, listed in Schedule D of the *Teachers' Qualifications Regulation*, is recorded on the teacher's Certificate of Qualification and Registration.

In this document, all references to “candidates” are to teachers enrolled in the Additional Qualification course. References to “students” indicate those in school programs.

3. Foundations of Professional Practice

The *Foundations of Professional Practice* conveys a clear vision of what it means to be a teacher which is at the core of teacher professionalism. The *Ethical Standards for the Teaching Profession* and the *Standards of Practice for the Teaching Profession* (Appendix 1) provide the focus for ongoing professional learning and are the foundation for the development of the Additional Qualification Course: Integration of Information and Computer Technology in Instruction Part II. In addition, the *Professional Learning Framework for the Teaching Profession* is underpinned by the standards, articulates the principles on which effective teacher learning is based and acknowledges a range of options that promote continuous professional learning. The ongoing enhancement of informed professional judgment, which is acquired through the processes of lived experience, inquiry, and reflection, is central to the embodiment of the standards and the Professional Learning Framework within this AQ course and professional practice.

Teacher-Education Resources

The College has developed resources to support the effective integration of the standards within Additional Qualification courses. These teacher education resources explore the integration of the standards within professional practice through a variety of educative and inquiry-based processes. This guideline has been designed to reflect the *Ethical Standards for the Teaching Profession* and the *Standards of Practice for the Teaching Profession* and the *Professional Learning Framework for the Teaching Profession*. A list of these resources can be found in Appendix 2 and are available through the College web site (www.oct.ca). These resources support the development of professional

knowledge and professional judgment through reflective practice. The lived experiences of Ontario educators are illuminated in the resources and serve as AQ course support for teacher education.

4. Course Components

The design, course content and implementation of the Additional Qualification Course Guideline: Integration of Information and Computer Technology in Instruction Part II support effective teacher education practices. These course guideline components provide a conceptual map for the development of a holistic and integrated course. The following course components of this guideline support and inform effective professional knowledge, judgment and practice within the Additional Qualification Course: Integration of Information and Computer Technology in Instruction Part II.

A) *The Ethical Standards for the Teaching Profession and the Standards of Practice for the Teaching Profession:*

The *Ethical Standards for the Teaching Profession* and the *Standards of Practice for the Teaching Profession* represent a collective vision of professional practice. At the heart of a strong and effective teaching profession is a commitment to students and their learning. Members of the Ontario College of Teachers, in their position of trust, demonstrate responsibility in their relationships with students, parents, guardians, colleagues, educational partners, other professionals, the environment and the public.

The holistic integration of the standards within all course components supports the embodiment of the collective vision of the teaching profession that guides professional knowledge, learning, and practice. The following principles and concepts support this holistic integration within the AQ course.

- understanding and embodying care, trust, respect and integrity
- fostering commitment to students and student learning
- integrating professional knowledge
- enriching and developing professional practice
- supporting leadership in learning communities
- engaging in ongoing professional learning.

Through professional dialogue and collaborative reflection, course candidates will continue to inquire into and refine professional practice through the lens of the standards.

B) Overall Expectations

The *Ethical Standards for the Teaching Profession* and the *Standards of Practice for the Teaching Profession* are embedded within the overall expectations of this guideline.

This Additional Qualification course has the following overall learning expectations for candidates:

- deepening understanding of the implementation of Ontario’s curriculum, policies, frameworks, strategies and guidelines
- integrating awareness of First Nations, Métis and Inuit ways of knowing and perspectives into practice
- extending theoretical understanding to design, implement and assess programs and/or practices related to Integration of Information and Computer Technology in Instruction
- implementing strategies and assessment practices linked to expectations in response to the individual needs of students, and the promotion of student success
- applying principles of holistic learning environments (intellectual, social, emotional, physical, environmental, linguistic, cultural, spiritual and moral)
- applying strategies for collaboration with in-school personnel, parents/guardians and the community
- integrating a variety of appropriate resources, including technological and communication resources, to enhance professional knowledge in support of student learning
- refining professional practice through ongoing collaborative inquiry, dialogue and reflection
- applying an awareness of ethical practices
- developing a culture of ethical practices related to the use of information and computer technology
- understanding the application of legal considerations related to working with digital resources

- exploring strategies to encourage participation in professional learning communities to enhance professional knowledge and support student learning
- exploring innovative approaches for integrating environmentally respectful perspectives and practices
- critically exploring innovative strategies to create and sustain safe, equitable and inclusive learning environments that honour and respect diversity
- deepening an understanding the impact of emerging technologies on learning
- deepening understanding of comfort levels in the use of technologies to support instruction
- designing curriculum and programs that integrate digital technologies to support, extend and enrich student learning
- planning instructional strategies to integrate information and computer technology tools through reflection, active engagement and collaboration
- assessing a variety of creative approaches for the integration of information and computer technology in instruction
- deepening understanding of the importance of critically examining qualitative and quantitative research related to professional practice.

C) Ontario Curriculum, Policies and Resources

The Additional Qualification Course: Integration of Information and Computer Technology in Instruction Part II is aligned with current Ontario curriculum, relevant legislation, government policies, and resources. These documents inform the development and implementation of the Additional Qualification Course: Integration of Information and Computer Technology in Instruction Part II and can be viewed at www.edu.gov.on.ca.

Course candidates are also encouraged to critically explore the policies, practices and resources available at school and board levels that may also inform Integration of Information and Computer Technology in Instruction teaching and learning.

D) Theoretical Foundations of Integration of Information and Computer Technology in Instruction Part II

- applying theories of child and adolescent development

- selecting and applying conceptual frameworks for the integration of information and computer technology in instruction
- implementing Ontario curriculum and government policies relevant to the integration of Information and Computer Technology in Instruction
- integrating reflection and professional dialogue inform both theory and practice in the integration of Information and Computer Technology in Instruction
- integrating teaching practices that reflect how the *Ethical Standards for the Teaching Profession* and the *Standards of Practice for the Teaching Profession* serve as the foundation for teacher professionalism within the Additional Qualification course Integration of Information and Computer Technology in Instruction Part II
- deepening understanding of the significance of the Ontario Human Rights Code, Ontarians with Disabilities Act, and the Accessibility for Ontarians with Disabilities Act (AODA) and associated responsibilities within professional practice.

E) Program Planning, Development and Implementation

- adapting programs to reflect positive, equitable, accepting and safe learning communities
- implementing a program planning framework that reflects the *Ethical Standards for the Teaching Profession* and the *Standards of Practice for the Teaching Profession*
- developing and implementing practices that are sensitive to society's diverse and changing nature and its influence on students
- exploring innovative ways to connect to students' authentic information and computer technology interests and experiences
- planning, developing and implementing programs that reflect the rapid changes in information and computer technology
- engaging in program planning and the development of implementation strategies and frameworks for the integration of information and computer technology in instruction
- integrating differentiated instruction and universal design in program planning, development and implementation

- identifying, accessing, integrating and assessing community, collegial, print, and electronic resources related to the integration of information and computer technology in instruction
- using and adapting information and computer technologies to support ministry expectations across the curriculum
- assessing and evaluating the potential use of key software applications such as graphic, video, audio, database, word processing and spreadsheets when applied to specific curriculum initiatives
- assessing and evaluating the potential use of key online applications (for example, social media, email, search engines, directories, collaborative tools) when applied to specific curriculum initiatives
- utilizing e-learning services and resources and Ontario's e-Learning Strategy in the delivery of curriculum initiatives (for example, Ontario Educational Resource Bank)
- developing models of hardware distribution that promote the integration of information and computer technology in instruction
- planning for the use of supportive and assistive technologies
- accessing software and hardware to support the integration of information computer technology across curriculum
- developing and integrating culturally responsive pedagogy within program planning and development
- deepening an understanding of the mental health needs of students and the implications for teaching and learning.

F) Instructional Strategies and the Learning Environment

- implementing information and computer technology strategies to foster a collaborative community of learners
- integrating relevant information and computer technology to support student learning
- applying and creating a variety of instructional strategies to support the integrate information and computer technology in instruction
- applying and implementing a variety of strategies for adapting, modifying and accommodating instruction to meet the needs of all learners

- adapting and integrating strategies for the creation of inclusive learning environments that reflect the ethical standards and standards of practice and affirms the need to respect and conserve resources in the environment
- enhancing the application of pedagogies that reflect the professional identity of educators as described in the ethical standards, the standards of practice and in the *Foundations of Professional Practice*
- implementing alternative expectations, courses and programs to meet the needs of all learners.

G) Assessment and Evaluation

- creating fair, equitable, transparent, valid and reliable assessment and evaluation methods that honour the dignity, emotional wellness and cognitive development of all students
- implementing assessment, evaluation and reporting processes that are consistent with the principles and practices and expectations reflected in Ontario's policy documents
- implementing assessment for the following three purposes: to provide feedback to students and to adjust instruction (assessment *for* learning); to develop students' capacity to be independent, autonomous learners (assessment *as* learning); to make judgements about the quality of student learning (assessment *of* learning)
- integrating multiple assessment methods that are ongoing, varied in nature and implemented over a period of time to support student learning
- integrating multiple assessment methods to support student learning: diagnostic, formative, and summative
- integrating information and computer technology tools to support assessment and evaluation.

H) Shared Support for Learning

- developing and implementing strategies for continuous, meaningful, detailed and supportive communication with parents/guardians and the community
- engaging in opportunities for professional collaboration that supports student learning

- recognizing and responding to opportunities for shared responsibility and partnership as conveyed in the *Foundations of Professional Practice* and exploring their potential
- accessing professional learning opportunities for integrating information and computer technology in instruction
- fostering and sustaining a positive, welcoming school climate in which all parent perspectives are encouraged, valued and heard.

I) Legal and Ethical Issues

- considering ethical issues and responsibilities related to the integration of information and computer technologies in instruction when planning curriculum initiatives
- using relevant school, board and provincial guidelines, procedures, policies and regulations for the use of internet information and computer technology
- exercising safe and equitable use of electronic resources with peers, students and parents/guardians
- adhering to Intellectual Property rights in the use of information and computer technology in instruction.

J) Research and Development

- critically reflect current practice in relation to past, present and evolving practices in *Integration of Information and Computer Technology in Instruction*
- exploring professional practice through ongoing inquiry into theory and pedagogy/andragogy
- engaging in professional learning through research, scholarship and leadership
- integrating research and the scholarship of pedagogy/andragogy into teaching practice
- collaborating in research and the scholarship of pedagogy/andragogy
- exploring ways to implement knowledge-creation and mobilization within professional practice.

5. Instructional Practice in the Additional Qualification Course Integration of Information and Computer Technology in Instruction Part II

In the implementation of this Additional Qualification course, instructors use strategies that are relevant, meaningful and practical in providing candidates with learning experiences about program, instruction, pedagogy and assessment and evaluation. These include but are not limited to small group interaction, action research, presentations, independent inquiry, problem solving, collaborative learning and direct instruction.

Instructors model the standards, honour the principles of adult learning, recognize candidates' experience and prior learning and respond to individual needs. Important to the course are opportunities for candidates to create support networks and receive feedback from colleagues and instructors and share the products of their learning with others. Opportunities for professional reading, reflection, dialogue and expression are also integral parts of the course.

. Instructors model effective instructional strategies and formative and summative assessment that can be replicated or adapted in the candidate's classroom.

A. Experiential Learning

Candidates will be provided with opportunities to engage in experiential learning related to key concepts and aspects of Integration of Information and Computer Technology as collaboratively determined by both the instructor and course candidates. The intent of the experiential learning opportunities is to support the application and integration of practice and theory within the authentic context of teaching and learning. Candidates will also engage in critical reflection and analysis of their engagement in experiential learning opportunities related to Integration of Information and Computer Technology. The professional judgment, knowledge and pedagogy of candidates will be enhanced and refined through experiential learning and inquiry.

The College's standards resources (Appendix 2) can be integrated into AQ courses to help support experiential learning through professional inquiry.

6. Assessment and Evaluation of Candidates

At the beginning of the course, candidates are provided with the specific learning expectations and forms of assessment and evaluation that will be used throughout the course. Instructors will provide opportunities for regular feedback regarding candidates' progress throughout the course.

A balanced approach to candidate assessment and evaluation is used. It includes the combination of self and peer assessment and instructor evaluation, and models effective practices. A variety of assessment approaches will be used that enable candidates to convey their learning related to course expectations. The course provides opportunities for both formative and summative assessment and evaluation.

Central to candidates enrolled in Additional Qualification courses is the opportunity to be engaged in relevant and meaningful work. Assignments, artefacts and projects enable candidates to make connections between theory and practice. At the same time, assignments must allow candidates flexibility, choice, and individual inquiry opportunities.

Part of the evaluation process may include a major independent project or action research component over the duration of the course. This project is an opportunity for candidates to illustrate a high level of professional knowledge, communication skills, pedagogy, ethical practices and instructional leadership. Similarly, if a portfolio assignment is used, it will also include reflections and analysis of a candidate's learning over time.

A final culminating experience in the course is recommended. This experience may take the form of a written assessment, a research paper, a performance, an inquiry project or a product that is genuinely new, meaningful and practical.

The following list of assessment strategies which are reflective of experiential learning is not exhaustive; it is intended to serve as a guide only:

- a) Performance assessment: designing a sample unit which includes a culminating activity and appropriate assessment and evaluation tools, incorporates a variety of technologies and resources relevant to the study of Integrating Information and Computer Technology in Instruction and is based on Ministry of Education curriculum expectations

- b) Written assignment: reflecting critically on issues arising from articles, publications, research and/or other resources related to the Integration of Information and Computer Technology in Instruction
- c) Presentation: developing a digital story, presenting an issue related to the Integration of Information and Computer Technology in Instruction
- d) Portfolio: creating a portfolio of practical resources, artefacts, photographs and recording critical reflections for one or several components related to the Integration of Information and Computer Technology in Instruction
- e) Action research: engaging in action research by reflecting and acting upon a specific inquiry related to the Integration of Information and Computer Technology in Instruction
- f) Independent project: addressing any aspect of the course that is approved by the instructor
- g) Instructional resource: developing a meaningful resource that will support instruction and pedagogy related to the Integration of Information and Computer Technology in Instruction
- h) Reflective writing: reflecting on professional practice through journal writing, or writing a case or vignette that will support instruction and pedagogy related to the Integration of Information and Computer Technology in Instruction
- i) Case inquiry: writing or exploring a case related to collaboration and shared partnerships, with parents, colleagues, and community organizations
- j) IEP development: collaboratively develop an IEP related to Integration of Information and Computer Technology in Instruction. with the family, student and school team
- k) Facilitating a Learning Experience: developing and implementing an engaging learning experience that reflects differentiated instruction and universal design.

Appendix 1

The *Ethical Standards for the Teaching Profession*

The *Ethical Standards for the Teaching Profession* represent a vision of professional practice. At the heart of a strong and effective teaching profession is a commitment to students and their learning. Members of the Ontario College of Teachers, in their position of trust, demonstrate responsibility in their relationships with students, parents, guardians, colleagues, educational partners, other professionals, the environment and the public.

The Purposes of the Ethical Standards for the Teaching Profession are:

- to inspire members to reflect and uphold the honour and dignity of the teaching profession
- to identify the ethical responsibilities and commitments in the teaching profession
- to guide ethical decisions and actions in the teaching profession
- to promote public trust and confidence in the teaching profession.

The Ethical Standards for the Teaching Profession are:

Care

The ethical standard of *Care* includes compassion, acceptance, interest and insight for developing students' potential. Members express their commitment to students' well-being and learning through positive influence, professional judgment and empathy in practice.

Respect

Intrinsic to the ethical standard of *Respect* are trust and fair-mindedness. Members honour human dignity, emotional wellness and cognitive development. In their professional practice, they model respect for spiritual and cultural values, social justice, confidentiality, freedom, democracy and the environment.

Trust

The ethical standard of *Trust* embodies fairness, openness and honesty. Members' professional relationships with students, colleagues, parents, guardians and the public are based on trust.

Integrity

Honesty, reliability and moral action are embodied in the ethical standard of *Integrity*. Continual reflection assists members in exercising integrity in their professional commitments and responsibilities.

The Standards of Practice for the Teaching Profession

The *Standards of Practice for the Teaching Profession* provide a framework of principles that describes the knowledge, skills, and values inherent in Ontario's teaching profession. These standards articulate the goals and aspirations of the profession. These standards convey a collective vision of professionalism that guides the daily practices of members of the Ontario College of Teachers.

The Purposes of the Standards of Practice for the Teaching Profession are:

- to inspire a shared vision for the teaching profession
- to identify the values, knowledge and skills that are distinctive to the teaching profession
- to guide the professional judgment and actions of the teaching profession
- to promote a common language that fosters an understanding of what it means to be a member of the teaching profession.

The Standards of Practice for the Teaching Profession are:

Commitment to Students and Student Learning

Members are dedicated in their care and commitment to students. They treat students equitably and with respect and are sensitive to factors that influence individual student learning. Members facilitate the development of students as contributing citizens of Canadian society.

Professional Knowledge

Members strive to be current in their professional knowledge and recognize its relationship to practice. They understand and reflect on student development, learning theory, pedagogy, curriculum, ethics, educational research and related policies and legislation to inform professional judgment in practice.

Professional Practice

Members apply professional knowledge and experience to promote student learning. They use appropriate pedagogy, assessment and evaluation, resources and technology in planning for and responding

to the needs of individual students and learning communities. Members refine their professional practice through ongoing inquiry, dialogue and reflection.

Leadership in Learning Communities

Members promote and participate in the creation of collaborative, safe and supportive learning communities. They recognize their shared responsibilities and their leadership roles in order to facilitate student success. Members maintain and uphold the principles of the ethical standards in these learning communities.

Ongoing Professional Learning

Members recognize that a commitment to ongoing professional learning is integral to effective practice and to student learning. Professional practice and self-directed learning are informed by experience, research, collaboration and knowledge.
